Kirti Foods Pvt. Ltd.

Company Profile

Kirti Foods Pvt. Ltd. is one of the oldest and pioneer names in list of dry vegetables manufacturing company, Kirti Foods Pvt. Ltd. is established in 1993 in mahuva (Gujarat) in India. Mahuva is a place richly blessed with a climatic environment that favors the growth of white onions making it the second largest producer of onions.

We are committed to produce the quality dehydrated products and for that we have setup latest technology machineries like auto color sorter, metal detection & aspirator to clean dehydrated products from discolor particle, metallic impurities & unwonted skins.

To maintain quality throughout production process we continues inspection & lab testing facilities in which we can conduct microbiology tests like Standard Plate Count, Yeast & Mould, Coliform, E-coli, Salmonella. Physical tests like Moisture, Sensory/Color, Sieve Analysis.

In addition we have a huge warehouse for storage of Final Processed Dehydrated White Onion Products at our Factory Premises. Environmental control of temperature, humidity and pests are done to minimize any changes in food quality during storage.

Our trained storekeeper and supervisor look after this, for better shelf life and good appearance of products. For faster product identification and traceability, we keep all products on pallets which are tagged with complete details of product.

Mission

We strive vigorously for winning customer satisfaction by producing best products strictly as per the customer requirements.

Kirti Foods Pvt. Ltd. is a result oriented & customer focused company to deliver on time, cost effective products.

We strive to preserve the natural characteristics of the product without any loss of flavour, colour and aroma. time, cost effective products.

Vision

To be a successful leader in food industry through development trusted quality product with customer satisfaction.

Quality Control

We say "Quality is about what we live and we survives" we ensuring the quality from raw material till final produces. Our experience team and the exceptional nature of weather, we are able to provide best quality products.

Ensuring the complete quality control and traceability thorough and regular quality check of each raw material batch till each final product's lot, and quality check during whole process with our in-house laboratory. We arranging third party inspection and testing of products according to customers need, we follow ADOGA, ASTA, ESA and BIS standards.
